DETAILED ACTION

The preliminary amendment has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claim 6, 12, and 13are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6, 12, and 13 recites the limitation "the seat" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 1. Claims 1, 4, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by EP0272233. See figures 3, 4, and 5.

EP'233 teaches a rock bolt (11) including a connection unit which comprises means (34) for detachable interaction (means plus function limitation interpreted as "threads" as disclosed on page 5, line 26 of applicant's specification) with an expansion means; in that the external dimension of the connection unit is such that it can be

Art Unit: 3673

inserted into the borehole (see, e.g. col. 3, first paragraph) as called for in claim 1. Note that claim 1 is not interpreted as requiring the suspension element, but requiring only the connection means.

Regarding claim 4: see col. 2, line 10.

Regarding claim 7: see col. 2, line 46 through col. 3.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1, 4, 5, 7, 8, 9, 16, 17, 19, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP0272233 in view of Calhoun (U.S. Patent number 4,255,070).

EP'233 shows the rock bolt, connection unit, means for detachable interaction, and the connection unit dimensioned to fit within the borehole. Insofar as claim 1 requires a suspension element, EP'233 fails to disclose it.

Calhoun discuses a suspension element for a rock bolt, which is advantageously threadably connected to the rock bolt, in order to provide attachment for a monorail.

It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified the Ep'233 rock bolt to have included a suspension element as called for in claim 1, in order to suspend a monorail.

Regarding claim 4: see col. 2, line 10 of EP233.

Art Unit: 3673

With regards to claim 5: EP'233 teaches a male threaded connection unit, and therefore lacks the expansion means having a nipple that is inserted into the connection unit. It is apparent that a reversal of parts (i.e. substituting male for female) would result in the connection unit and nipple as claimed. The courts have held that such an obvious expedient is prima facie obvious. See In re Gazda, 219 F.2d 449, 104 USPQ 400 (CCPA 1955).

Regarding claim 7: see col. 2, line 46 through col. 3 of Ep233.

With regards to claim 8: Calhoun teaches a mounting lug.

With regards to claims 9, 16, 17, 19, and 20: Calhoun teaches the suspension element (22) and EP'233 discloses the expansion means (26,27).

3. Claims 2, 3, 6, 10, 11, 14, 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP0272233 and Calhoun (U.S. Patent number 4,255,070) as applied to claim 1 above, and further in view of either one of Campbell, et al. (U.S. Patent number 2,486,113) or Holzbach (U.S. Patent number 3,027,140)

EP'233 and Calhoun lack the sleeve.

Each of Campbell and Holzbach teach similar arrangements of threaded parts, which include sleeves. Official Notice is taken of the fact that such sleeves are known to be advantageous to connect threaded devices of dissimilar diameters, in order to facilitate manufacture. It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified the EP'233 device to have included a sleeve as called for in claims 2 and 6.

Art Unit: 3673

EP'233 teaches the flange (13) as called for in claim 3.

With regards to claims 10 and 11: EP'233 teaches a male threaded connection unit, and therefore lacks the expansion means having a nipple that is inserted into the connection unit. It is apparent that a reversal of parts (i.e. substituting male for female) would result in the connection unit and nipple as claimed. The courts have held that such an obvious expedient is prima facie obvious. See In re Gazda, 219 F.2d 449, 104 USPQ 400 (CCPA 1955).

With regards to claims 14-15: Calhoun teaches the suspension element (22) and EP'233 discloses the expansion means (26,27).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. WO2005119009A1 discloses (e.g. paragraph 23) a similar invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Kreck whose telephone number is 571-272-7042. The examiner can normally be reached on Mon-Thurs 530am-2pm; Fri: telework.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patricia Engle can be reached on 571-272-6660. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
